

**Janine Gibson, Green Party, Provencher**

---

Thank you SO much for your activism around Lake Winnipeg and our NEED to address your concerns.

As a Green, and as part of your Lake WPG Monitoring Network I will work to:

- renew the Lake Winnipeg Basin Program in Budget 2022.
- commit to using LWCBMN data to target federal dollars to phosphorus hotspots.
- establish and fund an Indigenous-led task force to ensure meaningful inclusion of Indigenous Knowledge in all future reporting and public policy processes for Lake Winnipeg.

Protecting Lake WPG and all our watersheds is a primary focus for me and has been for many years in my work with Hog Watch MB starting in the 90's examining the role industrial hog production plays in eutrophication of our waterways.
